Will do Eric,

The lab said they did indeed leave the metal in the sample. They did not remove it.

Hi Patrick. Please copy Lyndsey on any technical info. She doesn't need to be copied on contractual communications. As far as metal. You meant to write the metal was not "included", correct?

Eric,

Just wanted to inform you of a message from Eberline concerning a sample from NFB. NFB-A03-S001-0006-01 contained a piece of metal, which got caught up in the laboratory jaw crusher. They removed it and did not exclude it from the sample, and is in the gamma spec aliquot as is. Please let me know if you have any concerns of this. And just for location reference this sample is the 0"-6" sample which lies about 50' south of the Area 7 entrance gate.

Thanks!
